

# High Energy Costs?

Save With Mueller Fre-Heaters and Plate Coolers!

The Mueller Fre-Heater recovers wasted heat from your milk cooler's condensing unit and uses it to heat water you can use for feeding calves and cleaning. Adding a Fre-Heater to your milk cooling system will drastically reduce the cost of hot water in your operation, thereby lowering your cost of production and enhancing your profitability.

A Mueller Accu-Therm plate cooler lets you use your existing water supply to pre-cool warm milk before putting it in your milk cooler. The Accu-Therm will cut the operation time of your refrigeration system up to 50 percent by pre-cooling milk by 30°F (-1.1°C). You'll save energy and money while enhancing your milk quality.
